**Detailed Action**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 19-27, 37-40, 45-53, 63-65, drawn to a vacuum source, associated displacement means and adhesive means on the substrate.

Group II, claim(s) 10-18, 28-36, 41-44, 54-62, drawn to a belt, motor and controller.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The features common to these claims have been disclosed in US 2004/0097012 discussed in the application. There appear to be at least two special technical features contained in the above claims: (1) a vacuum source, associated displacement means, and an adhesive means on the substrate, and (2) a belt, motor and controller. These technical features appear to be present in various combinations (along with other

features) in the above claims. Consequently there are two inventions in the present application. The requirement of unity of invention is not satisfied *a posteriori*.
